

DURASID is a complete cladding system that can be used for new buildings and renovation: ideal to be used in housing, static park homes and industrial buildings.

The core is made out of cellular PVC-U with a coextruded top layer. The system is an aesthetic alternative to traditional claddings.

The benefits of these external claddings are:

- little maintenance
- easy installation
- very durable
- impact resistant
- insulating function
- available in different finishing and colours
- natural look
