Marbrex™
decorative
### wall and ceiling panels

Simple to Install

Marbrex can be installed in about half the time required for tiling and can even be fitted over existing tiles. If the walls are clean, dry and flat then little preparation is necessary before the panels are fixed into place.
As a bonus there is no grout to keep clean.

Marbrex gives you a great finish every time and is ideal for use on the walls and ceilings of any room in the home, office, factory or any food preparation areas with a full range of trims and joints,

Wet walls

Marbrex designs can be used in all wet areas. The panels are waterproof and ideal for use in showers, wet rooms and as splash guards. They are an excellent alternative to traditional materials as they are maintenance free and easy to clean.

Decorative Design Systems

Marbrex decorative wall and ceiling panels are stylish and versatile. Designed to create the look and feel of marble, wood and stone Marbrex is a stunning alternative to paint, wallpaper, tiles and other wall covering systems.

Available in a wide range of colours and patterns, from traditional to the more contemporary, there is a design for almost any room in the home.

Advantages

Using Marbrex has many advantages over conventional methods of decorating such as tiles, paint or wallpaper. It is quick to install and easy to clean. It also provides some insulation to the room and so helps to reduce condensation.

moonstone

contemporary
and innovative designs

sandstone

The Sandstone, Moonstone and Anthracite designs have a matt finish which helps to give them the appearance of stone. They also offer the opportunity to be creative with their irregular offset tile effect.

Whether you require a neutral, calming palette or something more dramatic that makes a statement, you're sure to find the finish you require in the Marbrex range.

The Stile range of panels features an attractive tile effect that incorporates the illusion of grout. However, as with other Marbrex panels, Stile fits together without the need for grouting.
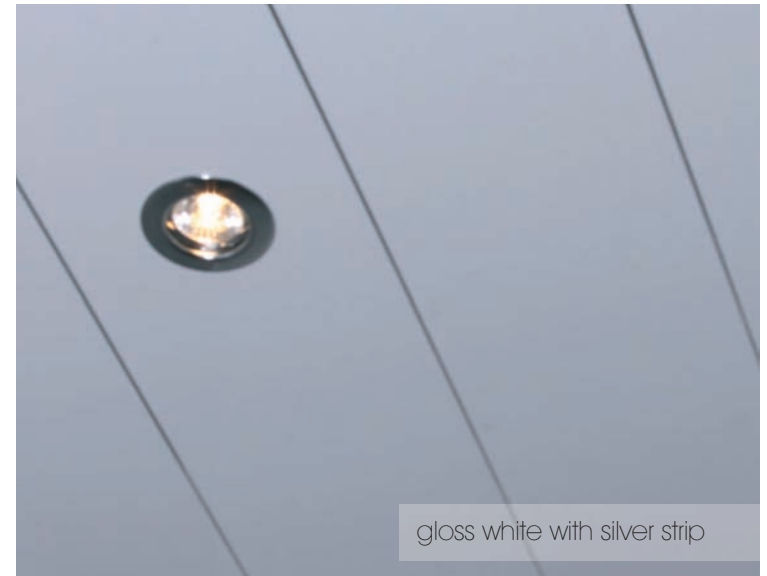

Panels can be arranged in four possible configurations to create an authentic finish, as shown opposite. Each panel is 1.2m x 250mm and features a 3 x 400mm tile pattern. A grout effect lip at the end of each panel allows panels to be easily joined together, giving a neat, clean finish.
