

## Materials

Orac Decor® ornaments are made from advanced materials which are resistant, lightweight and easy to install. These unique product features distinguish Orac Decor® profiles from products made of wood, MDF or plaster.

The majority of the products are made from a high-quality polyurethane that allows for sharp details (Purotouch®).

Part of the collection is made from an extruded, impact-resistant polymer (Duropolymer®), while the basic collection uses Durofoam®.

A large number of cornice, panel and skirting profiles are available in a flexible variant: Orac® Flex. Naturally, all of these products can be painted immediately.

	Detail Design	Impact Resistance
<b>Purotouch®</b> A high-quality, high-density polyurethane that allows fine details.	★ ★ ★	★ ★
<b>Duropolymer®</b> An extruded and impact-resistant polymer based on a high-density polystyrene.	★ ★	★ ★ ★
<b>Durofoam®</b> An extruded lightweight polymer based on a medium-density polystyrene blend.	★	★
