

125mm Plain Galvanised Steel Joint Bracket

A = 125mm B = 145mm C = 72mm

125mm diameter Plain Galvanised Steel Gutter Joint Bracket (also known as union bracket)

- Connection element for gutter to gutter and gutter to corner
- Provides strength and rigidity to joints
- Lined with rubberised gasket for increased water tightness and stability to joint
- Compensates thermal expansion caused by temperature change
- Also known as a gutter union bracket
- For extra strengths at joints please also use a gutter joint element (especially recommended when joining onto gutter corners)

RoofArt Scandic plain galvanised products come with a 5 year manufacturers guarantee (This does not apply to coastal locations where Prelaq finish material is advised)
