

## 125mm Plain Galvanised Universal Stop End

**A = 125mm B = 69mm C = 159mm**

125mm diameter Plain Galvanised Universal Stop End

- Provides permanent stop end fixing, sealing and reinforcement to gutter.
- Lined with rubberised gasket for increased water tightness and stability to joint
- Universally handed - simply cut wing off with snips on the unwanted non-rolled edge
- Push fit joint. (a light tap with a rubber mallet is advised to ensure tight fit.
- Always fit stop end to a factory cut edge of the gutter. When gutters are needed to be cut use the cut edge at the joint on the union bracket rather than stop end.

For more information on how to install half round metal stop ends please see our fitting guide and installation video.

RoofArt Scandic plain galvanised products come with a 5 year manufacturers guarantee (This does not apply to coastal locations where Prelaq finish material is advised)
