

## 87mm Plain Galvanised Downpipe Connector

87mm Galvanised Downpipe Connector.

- To connect to straight lengths of pipe if the male end has been cut off.
- Female to end to sleeve over plain end of 87mm downpipe
- Socketed male end to fit inside plain end of pipe
- This item is only required when connecting two plain ends (cut ends) of pipe. If you are using full lengths of either 1m or 3m pipe then it will have a male socketed end.
