CASCADE

The complete wet space solution

The perfect wall panel solution for any bathroom, shower or wetroom – smart looking, easy to install and easy to clean, Cascade™ Shower Panels provide a flush waterproof and moisture resistant surface for new or existing walls – and can be fixed to all sorts of surfaces. Their Gloss, Matt lacquer water repellent surfaces offer additional insulation and sound proofing qualities and can be fitted over existing tiles with no grouting.

The extra wide panels fit together easily* and are available in a range of colours with a range of finishing trims – all backed with a 10 year guarantee. Ideal for wet spaces in residential, commercial, school and work premises.

TECHNICAL INFORMATION:

- Width: 1m, Height: 2.4m, Thickness: 10mm
- Light and easy to handle
- Waterproof, rot proof, hygienic
- Use product between -20 °C and +60 °C
- Only a low tack masking tape may be used during installation and removed immediately afterwards
- Simple to cut using a fine toothed saw
- Edging and finishing trims available
- Wide range of colours

10 YEAR GUARANTEE

For internal use only. When installed and maintained as per our instructions the product is covered by a 10 year guarantee against crazing or fading due to UV light.

CARE & MAINTENANCE

Cascade™ Shower Panels are hygienic and easier to maintain than tiles, with none of the grouting that discolours over time. To keep panels looking as good as new, simply wipe down with hot soapy water and a soft cloth. Abrasive cleaners must not be used.

*See website for fitting instructions

PATCHWORK

General information for panels and cladding

Maintenance: Use normal cleaning agents i.e. hot soapy water and a soft cloth or sponge. Solvents are not recommended, neither should aggressive cleaning agents be used.

Performance: Plastivan Decor is for internal use only, when installed and maintained as per our instructions, the product is covered by a 10 year guarantee against crazing or fading due to U.V light. Only a low tack masking tape may be used during installation and must be removed immediately afterwards.

Preparation: During the course of manufacture some variation in shade or pattern can occur. Sufficient panels for the area to be covered should be obtained in one consignment, all of the same production date (found on the ends of the packaging) to ensure a supply of compatible shades. Also check all the boards for any colour variation before installation.

Please ensure that the builder or installer is aware of this information as no liability can be accepted once panels have been fitted.

Fitting instructions available on our website
